

# Gigaset SL1 Professional

Alongside the system-specific HiPath telephones, Siemens offers a range of cordless phones that can be operated on the Siemens Cordless solution.

These cordless phones ensure that employees are constantly accessible throughout a company's premises. The Cordless Solution from the HiPath portfolio is ideal for organisations whereby mobility with the working arena is required but immediate contact still remains a necessity e.g. within the healthcare sector, retail sector and service industry.

## Gigaset SL1 Professional

The SL1 Professional is a cordless feature telephone based on the digital DECT/GAP standard. This handset sees the standardisation of user interfaces based on a Siemens GSM handset.

These phones enable greater flexibility within the working environment ensuring that employees remain in contact, which results in improved efficiency.

## Main Features

- GAP interface (mandatory features)
- Innovative features
- Reminder function for date/alarm and birthday
- Pre-dialling with correction facility
- Redial of the last 10 different numbers
- Phonebook with up to 200 entries and anniversary reminder
- Multilingual menu in 19 languages
- Adjustable handset volume
- Adjustable ringer volume
- Configurable tones for key presses, confirmation and battery life
- Multibase: handset can be registered on up to 4 base stations

# SIEMENS

Global network of innovation
